

On September 22 and 23 G105(WDGC) dedicated a segment of the Bob and Madison program to advocating violence against cyclists. I am an avid 60-year old cyclist following NC road regulations. Since the broadcast I have experienced several acts of road violence that have compromised my safety on my bike. This type of behavior from our radio stations is quite inappropriate and will lead to an increase in injury and deaths along our roads. The lack of responsibility from Clear Channel networks and the WDGC station in Raleigh should be reviewed by your agency and properly addressed. I intend to approach my Federal Representative and revendicate at the Federal level more initiatives to prevent violence from such radio broadcasters.
